Enthusiastic and detail-oriented software engineer dedicated to crafting innovative and impactful solutions. Leveraging a unique blend of technical prowess and hands-on experience, I am passionate about tackling new challenges. I am constantly seeking opportunities to enhance my skills in developing scalable software that makes a difference.

PROJECTS

🐙 hazemali1/Universe

UNIVERSE

📅 Dec 2023

- I have successfully implemented database management for my project using Python functions integrated with the Flask framework to create a robust API. Additionally, I have incorporated functionality to render data dynamically to HTML files, ensuring seamless integration with the frontend.

🐙 hazemali1/AirBnB_clone_v3

AirBnb Clone

📅 Nov 2023

- I've effectively administered the database operations for a cloned AirBnB project utilizing Python, leveraging the Flask framework. This involved establishing a solid foundation for backend functionalities to efficiently manage data storage, retrieval, and manipulation within the application environment.

🐙 hazemali1/Graduation-Project

Heraf Website

📅 mar 2024

- Developed a website catering to craftsmen and clients seeking their services.
- Implemented PHP PDO (PHP Data Objects) for efficient database management.
- Designed and launched the website to facilitate seamless connections between craftsmen and clients.

🐙 hazemali1/market

market Website

📅 May 2024

- Create a market website to allow users to buy and sell products
- Created By Python Language Flask framework and handle database with sql
